SEN IT314

Starting 10 January, 2018

Overall Objective of IT314Labs: Develop a software solution for a given case study following software engineering methodology

Lab 1

You need to do the following for Lab 1:

- Carry out Basic Background Reading with the help of the various relevant documents available on the internet for the given case study
- Develop Problem Description (4-20 pages, .doc file) based on Basic Background Reading
- Document Input and theOutput of the Background reading (.doc file) (5-10 different literature sources on the internet should be surveyed and documented)

- Name the files:

  - **Teamnumber_Lab1 Problem Description _Version 1.doc** (4-10 pages)

  - **Teamnumber_Lab1 Background Reading _Version 1.doc** (5- 10 literature sources URLs and their summary of each of them)

- Submit to the SEN lab submission folder at the end of lab

Keep all the versions of the documents that you submit to the folder. Don't overwrite any document. You may create a new version to accommodate changes if any.
